

IYES2013

International Youth Energy Summit

You are planning on coming to the BdP Bundeslager 2013 in Immenhausen with your group and you are interested in participating at an 24h-summit which was organized exclusively for you?

In advance you would like to do a project on the topic “Energy“ in your city or your unit and then you would like to present it at the camp?

Do you want to discuss your projects with scouts and guides from five continents and do you want to learn more about the topic “Energy“?

Then get going and apply!

5 Continents full of ideas

10 Scouting/ Guiding Groups for the energy revolution

A vision for the energy of the future

By groups starting at the age of 14

At the BdP Bundeslager 2013 in Immenhausen

IYES2013

International Youth Energy Summit

The schedule:

You apply by **April 15th 2013** with a concrete idea concerning the topic ENERGY, which you want to run in your city or unit prior to the camp.

We are excited to hear, how you want to do that!

The application can be a **video, photos, a project-outline or whatever else you can think of**. The main point is that we see who you are and what you want to do to prepare perfectly for creating a joint vision for the ENERGY of the future.

Throughout April you will find out if you made it. **From May 24th until May 26th** your leader will participate at the project meeting and will get to know the participating groups from Germany and other countries. Participation at this meeting is obligatory, **all costs for one person (including travel costs and lodging) for this are covered by us**.

Until the camp you will then have eight weeks to prepare. Throughout the camp there will be special programs offered during the "Bundeszeit". At the second last day of the camp (the so called LV-day) we will have a **YOUTH:ENERGY:SUMMIT** as a highlight and a close to the project, where you will be able to talk to economical, research and political experts as well as scouts from five continents and where you will learn more about energy or the energy-revolution. **Your joint vision for the future will be published at the closing evening of the camp**. You will of course be able to participate at the camp during the other days.

To cut a long story short:

- ✓ You can only participate at the summit if all participants of the project will also be present at the BdP Bundeslager. It is not possible to only participate at the summit.
- ✓ There will be seven spots for participants of each group at the energy summit but everyone who is interested can take part in the preparation.
- ✓ The costs for the BdP Bundeslager will stay the same as the normal participants charge. There are no additional charges.
- ✓ The YOUTH:ENERGY:SUMMIT is financially supported by the foundation "Avec et pour autres"

IYES2013

International Youth Energy Summit

No ideas for the preparation?

Scouts and Guides do it themselves... 2013 is energy-revolution-time: Two years after Fukushima we now want to deal with the topic "Energy of the future".

Are campfires still up to date or is an LED-imitation enough?

No matter if you implement precise constructional plans for your meet-up place, if you discuss the topic with politicians or if you do something together at school!

Are there alternatives to driving a car in your everyday life?

Think of a project, do some research, find interesting places and people in your area – you can try everything you can imagine between April and July. Use your meet-ups, camps and activities to realize your project.

Do you want to create a website or do you want to do something manual?

We are looking forward to your applications!
